Objective

Hi , I Am Alan Biju I have serious passion for web development and creating intuitive, dynamic user experiences and currently pursuing Computer Science Engineering in PESITM SHIMOGA my coding experience were built upon the HTML, CSS & JavaScript, but I have played in the past with some other things like C, React JS, Python ,Node JS .Self-motivated, highly passionate and hardworking fresher looking for an opportunity to work in a challenging organization to utilize my skills and knowledge in work.

Interested in everything that involves building the web.

I'm a hard worker, committed and self learner. Definitely, I'm not a guru jedi rockstar ninja, but I always get my stuff done.

Experience

The Entrepreneurship Network

(Jun, 2021 - Present)

React Developer

React JS JavaScript HTML CSS

Developing new user-facing features using React.js Building reusable components and front-end libraries for future use Translating designs and wireframes into high quality code Optimizing components for maximum performance across a vast array of web-capable devices and browsers

Education

Visvesvaraya Technological University

CGPA / Percentage: 71.97

(2022)

B.TECH / B.E. COMPUTER SCIENCE & ENGINEERING

PES INSTITUTE OF TECHNOLOGY & MANAGEMENT

CGPA / Percentage: 74.66

(2018)

PES INSTITUTE OF TECHNOLOGY & MANAGEMENT

CGPA / Percentage: 70.4

(2016)

Projects

Movie-tvShows-app

(Jan, 2021 - Jan, 2021)

<https://movieprime.netlify.app>

React Js HTML styled components(CSS) FireBase MovieDB(API) javascript git

Modern fast movie database web app with React using The Movie DB API and completely responsive User Story : Users can search for movies and Tv Shows Users can see upcoming movies ,Tv Shows in Home Page and users can also see Clicking on specific movies bring you all data about the movie including actors, durations, budget, rating and many more. Use the Search bar to find you favorites movies and their information Note: API may fail to fetch sometimes 😊

React JS

JavaScript

HTML 5

FireBase

git

styled-components(CSS)

This application was built using create-react-app as a base, and the technologies used were React (Custom Hooks, Context), Firebase & React Testing Library. I've also included styled-components in the application it enables dark mode! its completely stand alone Progressive Web Apps

<https://myinstagram-clone.netlify.app>

React JS

JavaScript

FireBase

HTML

Styled-components

git

others

An Instagram-clone with my own flavors and features!! Instagram Clone (Both frontend and backend) created with React and Firebase. This project is a Clone of the original Instagram UI. This Project provides some basic features, similar to the original application. P.S. This project has been developed for learning purposes, and it has nothing to do with the original Application.
